

FOCUS EQUITABLE VALUES (RT)

Factsheet, 31/08/2022

INVESTMENT FOCUS

The aim of FOCUS Equitable Values is to generate long term asset growth. To archive this goal, the fund invests – depending on market conditions – mainly into international equities or equivalent securities according to their ecological and social impact. Investing into demand and callable deposits is allowed. The active management approach is not influenced by a benchmark. Investments into financial instruments with foreign currencies are possible without currency hedging. Exchange rate fluctua-

tions could lead to additional opportunities and risks. Derivatives could be used for hedging and as part of the overall investment strategy.

FOCUS Equitable Values is allowed to primarily invest in liquid assets not being securities or money market instruments in the sense of the Investment funds law, namely demand or callable deposits as well as derivatives.
